## 06 Use Case

- Our Clients

# RemoteVS makes non-face-to face service easier.

## Non-face-to-face video consulting solution

RemoteVS enables agents to present products to customers and sign contracts online without meeting face-to-face.

# Trend | Telecom Companies

Add and expand non-face-to-face channels

## T-Factory

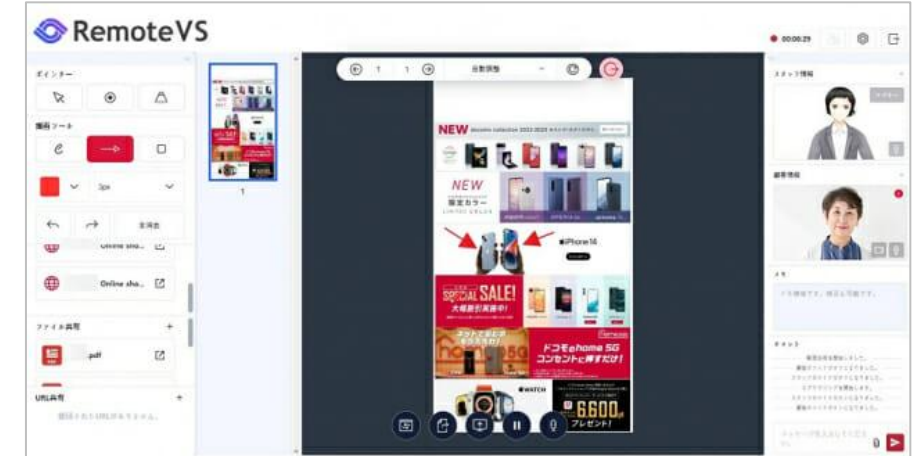

Open a 24/7 non-face-to-face store where customers can purchase smartphones and subscribe to products.

## U+Kiosk

Customers sign up, change plans, open SIMs, and subscribe to additional services without visiting the store.

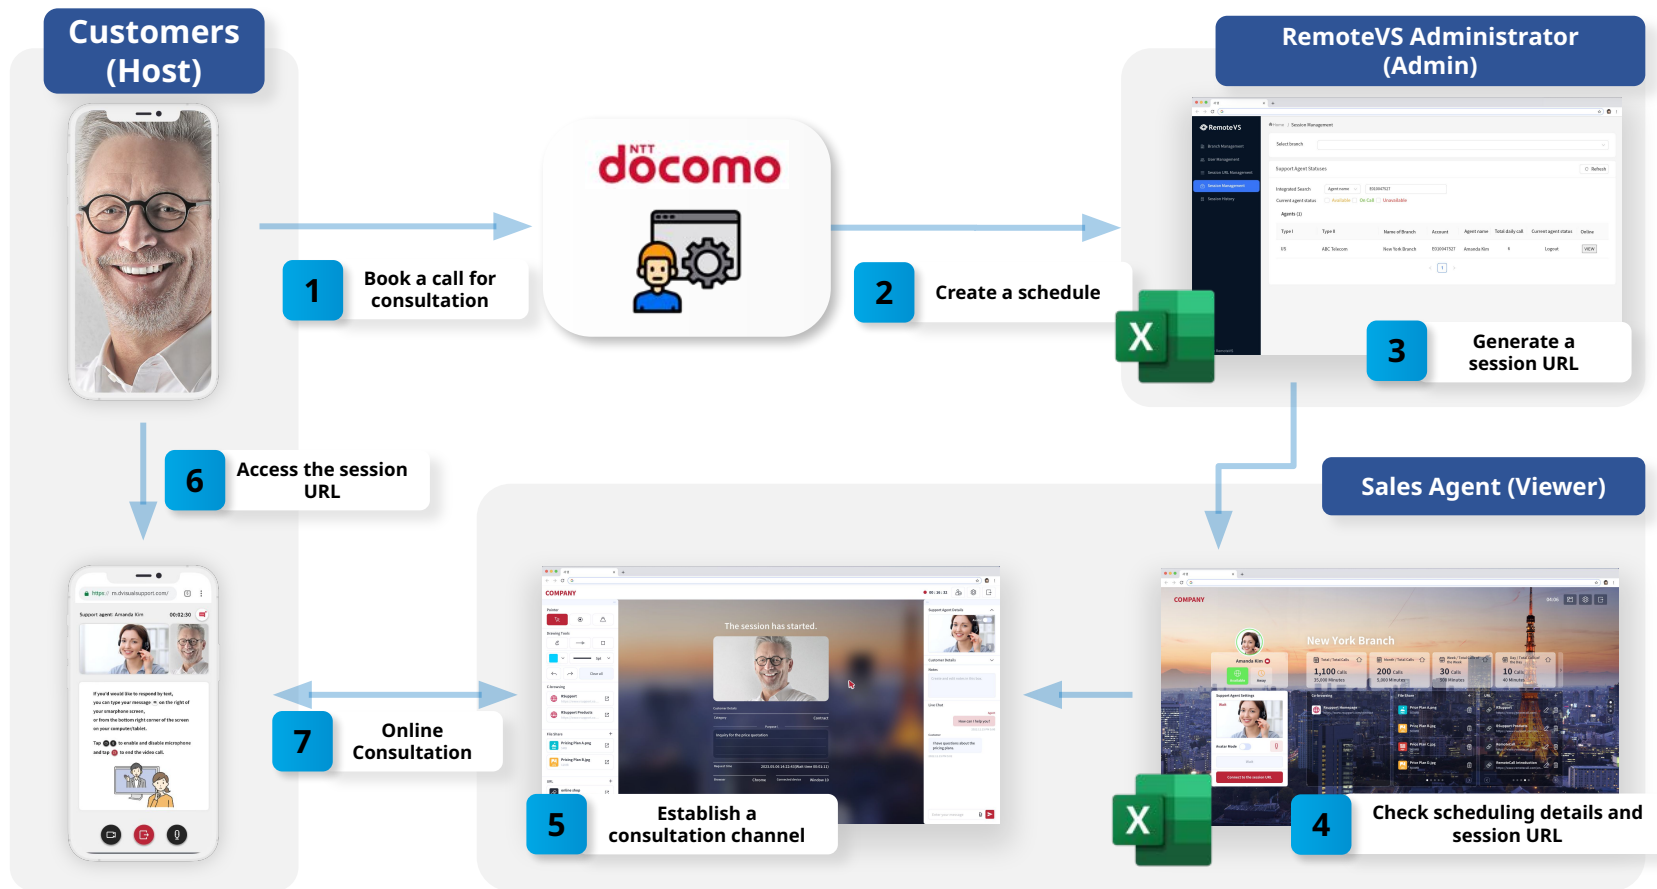

Build a non-face-to-face system

NTT DoCoMo, Japan's largest telecommunications company, built a non-face-to-face cloud-based system.

# Trend | Telecom Companies

RemoteVS is built at **NTT DoCoMo**, Japan's largest telecom company.

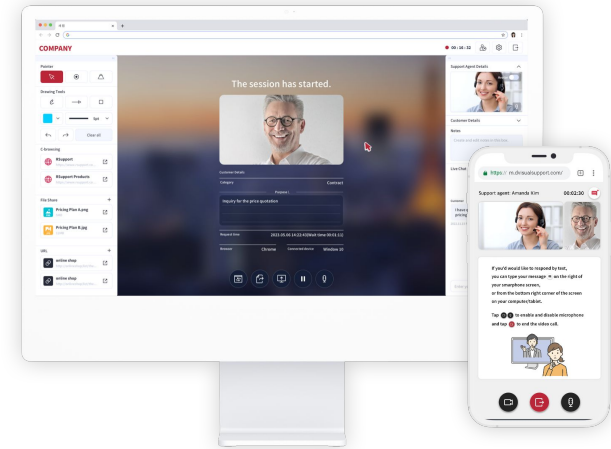

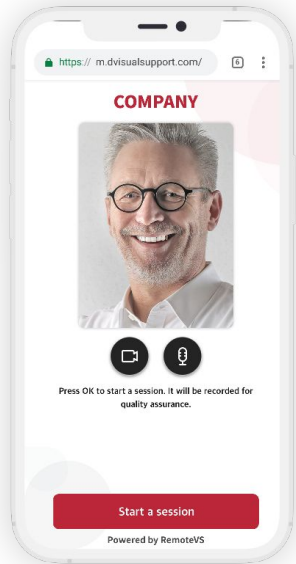

Easy scheduling for both customers and agents

- 1 Customer books a call using the consultation management system.
- 2 The administrator forwards the session URL created in the administrator system to the agent and customer.
- 3 The agent opens a live remote session with the URL, which starts when the customer is connected.

# Web-based service without installation

With RemoteVS, customers don't have to go through complicated steps, **all they need to do is access the web browser.**

## 01. Access from Customers

Without installing a separate app or program, **access through a web browser** and click 'Start a session'.

## 02. Instant Connection

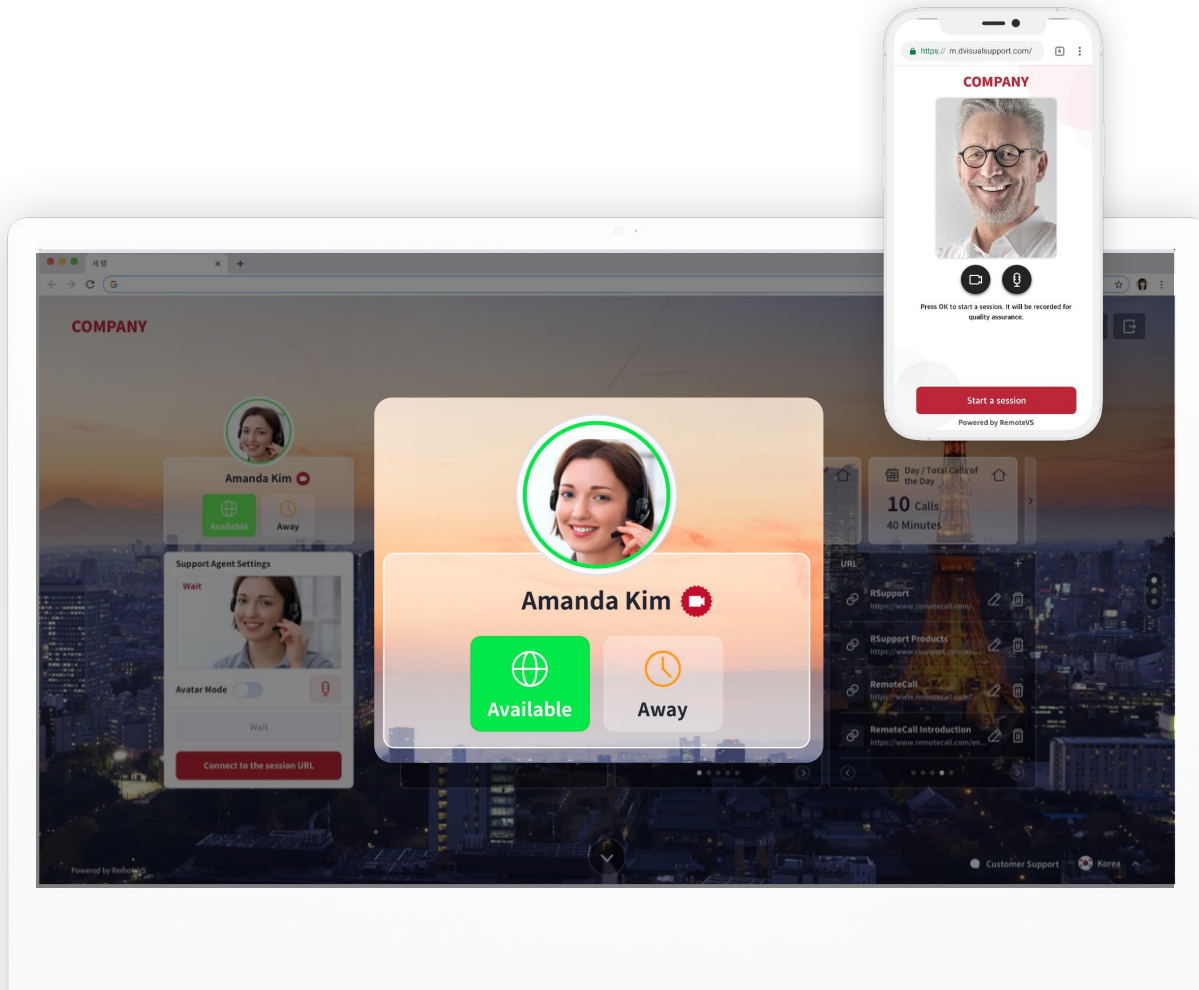

In the **Incoming Call pop-up** displayed on Agent Waiting page, click 'Start'.

## 03. Start Consultation

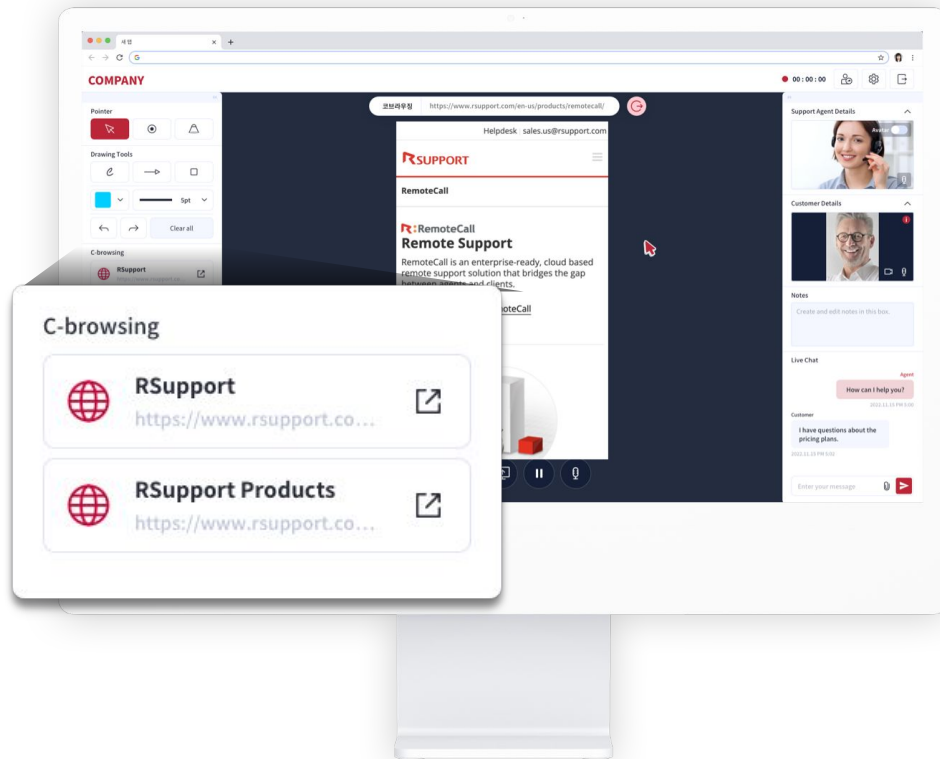

**Through video/screen/file sharing and co-browsing**, it is available to check details of contract product with customers and proceed to registration in real time.

# Easy and convenient to start a consultation

- ✓ If a customer makes a request for consultation on the web page, an agent who can consult is immediately connected.
- ✓ When a customer makes a consultation reservation on the web page, the URL is sent and the consultation is easily connected by accessing the URL at the reserved time.

# Communicate with your customers **immediately**

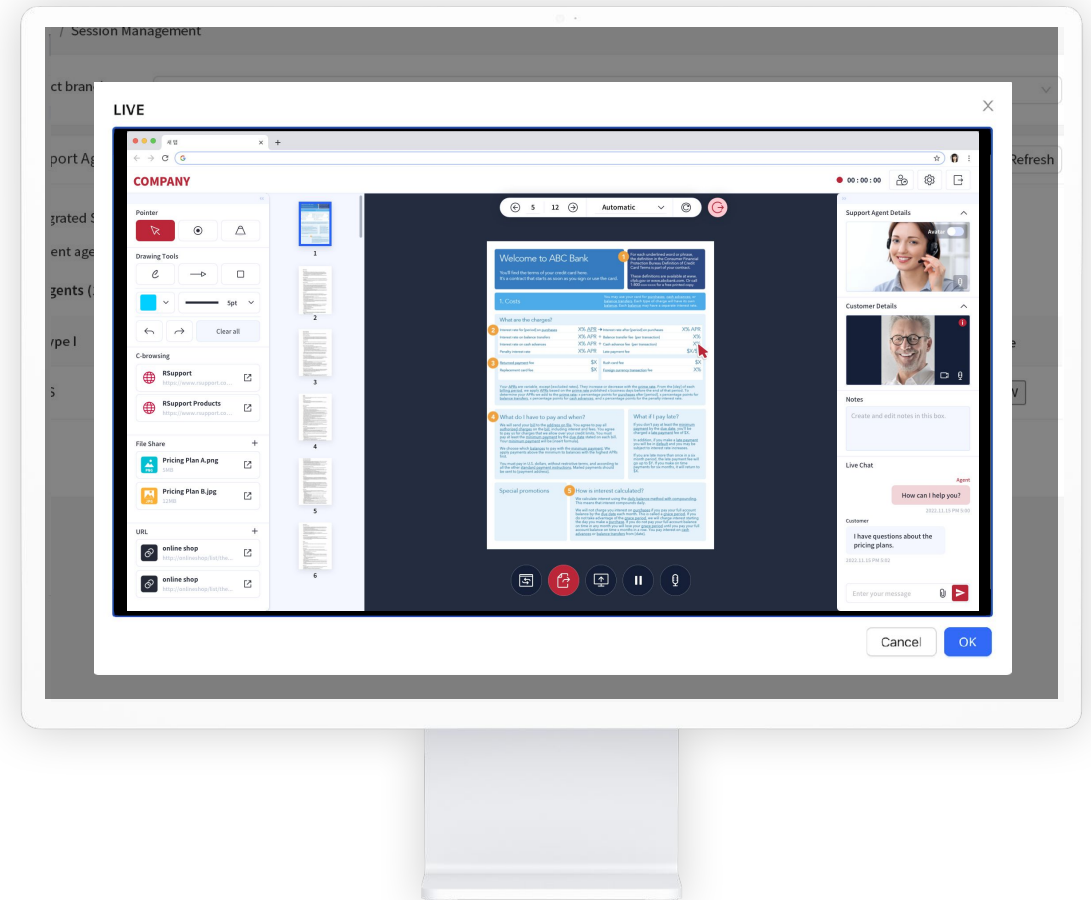

- ✔ If Co-browsing is running, if the agent clicks the web link registered in advance, it can be accessed directly from the customer's screen (one-click access).
- ✔ Screen sharing is possible by pressing the document button registered in advance by the agent (one-click sharing).

# Powerful functions for **administrator**

- ✓ When consulting starts, screen recording is automatically performed and administrator can check the contents of recording.
- ✓ Administrator can monitor consultation of agent in real time (LiveView)

# Main Functions

## Agent Functions

### Co-browsing

Agents and customers view the same screen and respond in real time.

### On-screen tools

Describe products with drawing tools and pointers.

### File and image sharing

Share files and images in real time.

### Live chat

Communicate with customers via live chat during consultations.

### Status settings

Consultation is conducted only when the status is Available.

### Share screen of agent

Guide and explain to customers by sharing agent's screen.

### Avatar profile

Set agent's profile by using avatar.

## Administrator Functions

### Screen Recording

Record and save screen during consultations in real time.

### LiveView

Monitor customer response status of all registered agents in real time.

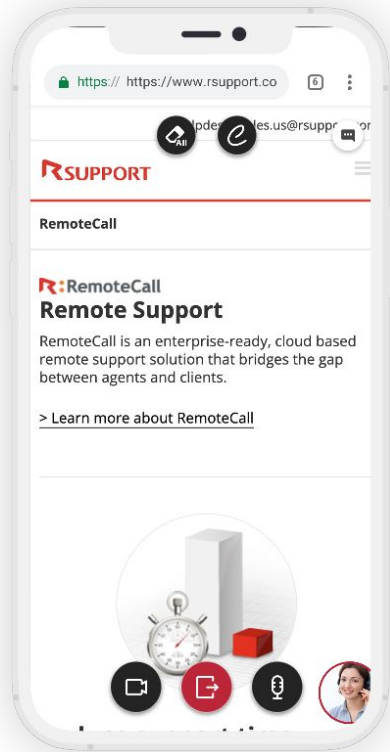

### Branch-by-branch Management

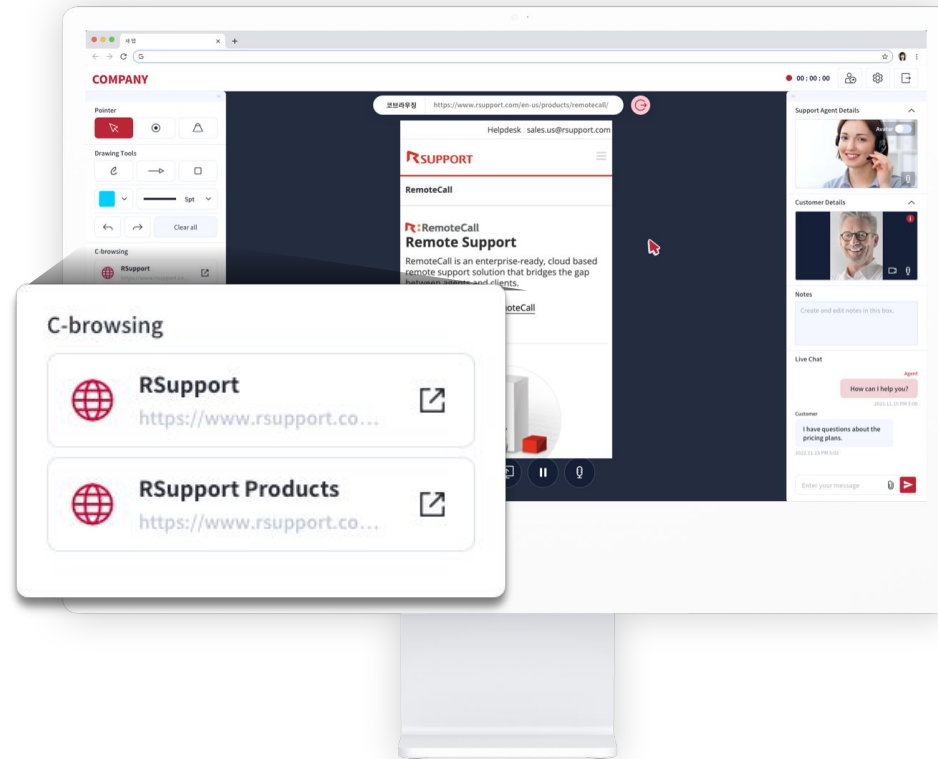

Check progress of each branch's consultation.

# Co-browsing

Agents and customers see same screen and respond in real time.

Screen of Customers

Screen of Agents

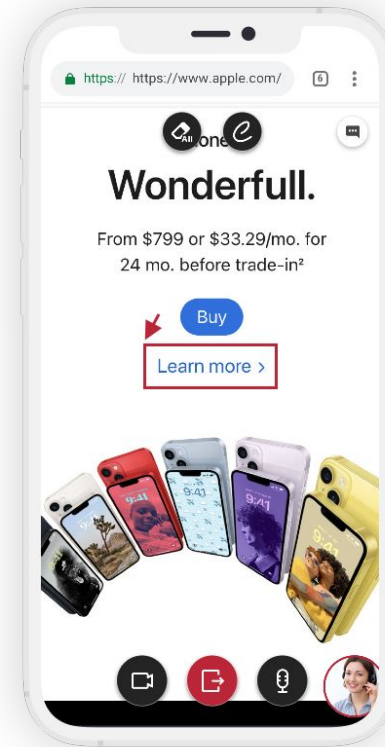

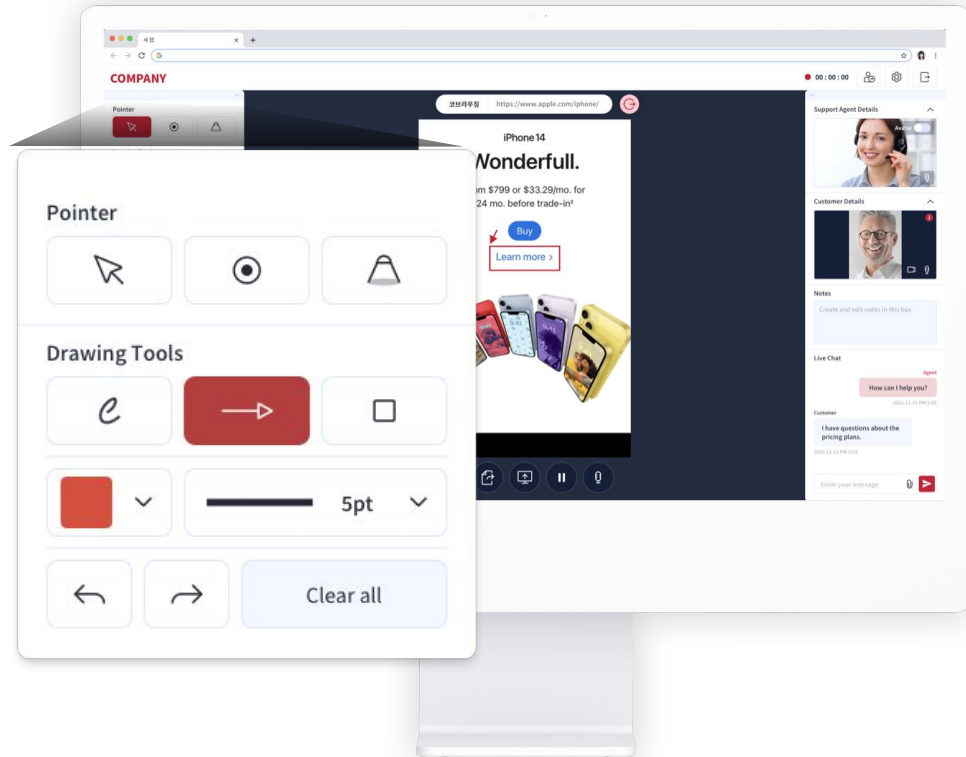

When a agent **shares a pre-registered co-browsing URL** with a customer, the agent can see what the customer sees in real time.

Through co-browsing, customers **can check and enter product details** to proceed payment or register in real time.

# On-screen tools

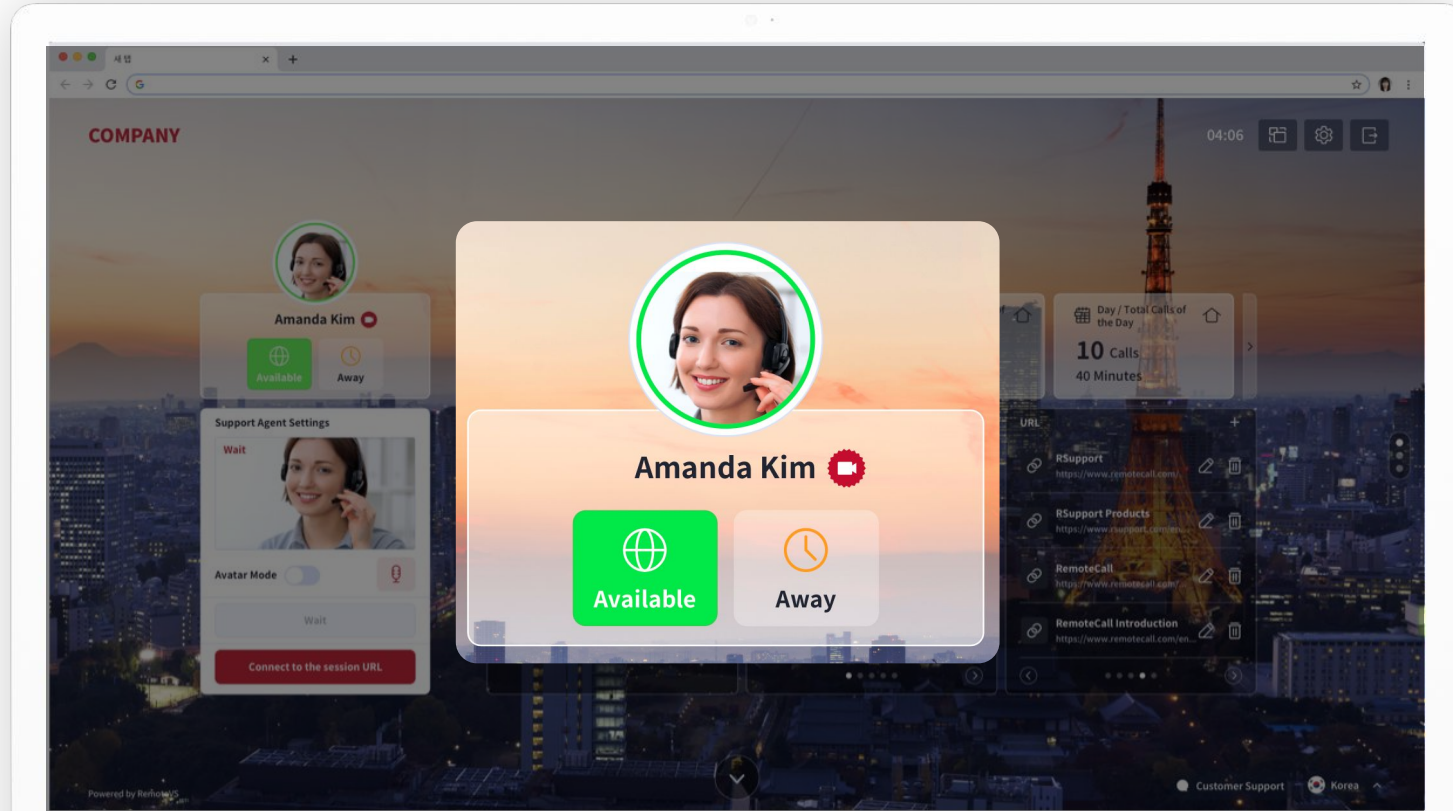

Use a variety of drawing tools to guide customers during co-browsing and file sharing.

- ✓ **Use pointers and drawing tools** while file/screen sharing and co-browsing to provide more detailed explanations to customers.
- ✓ Use various tools for faster and more accurate product guide.

# Agent status

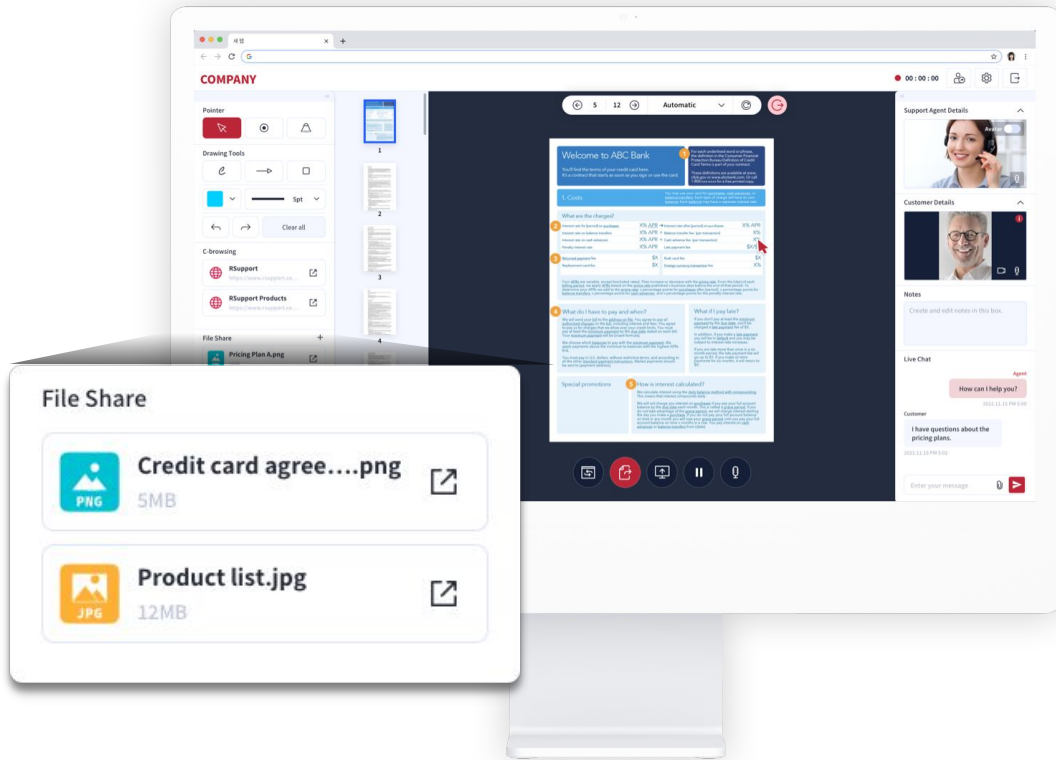

Set the status of agents and proceed with session only it is set as Available.

- ✓ Agents can set their status to **Available or Away** on the Agent Waiting page.
- ✓ When a customer requests a session when the status is on Available, it is automatically connected and proceeded.

# File and image sharing

Communicate by sharing the necessary files or images during sessions in real time.

✓ **Send files or images** registered in advance or saved in PC to chat window. Also share them on screen to view them together.

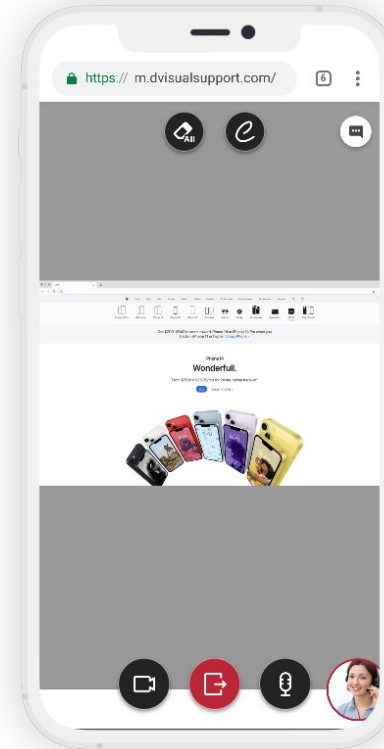

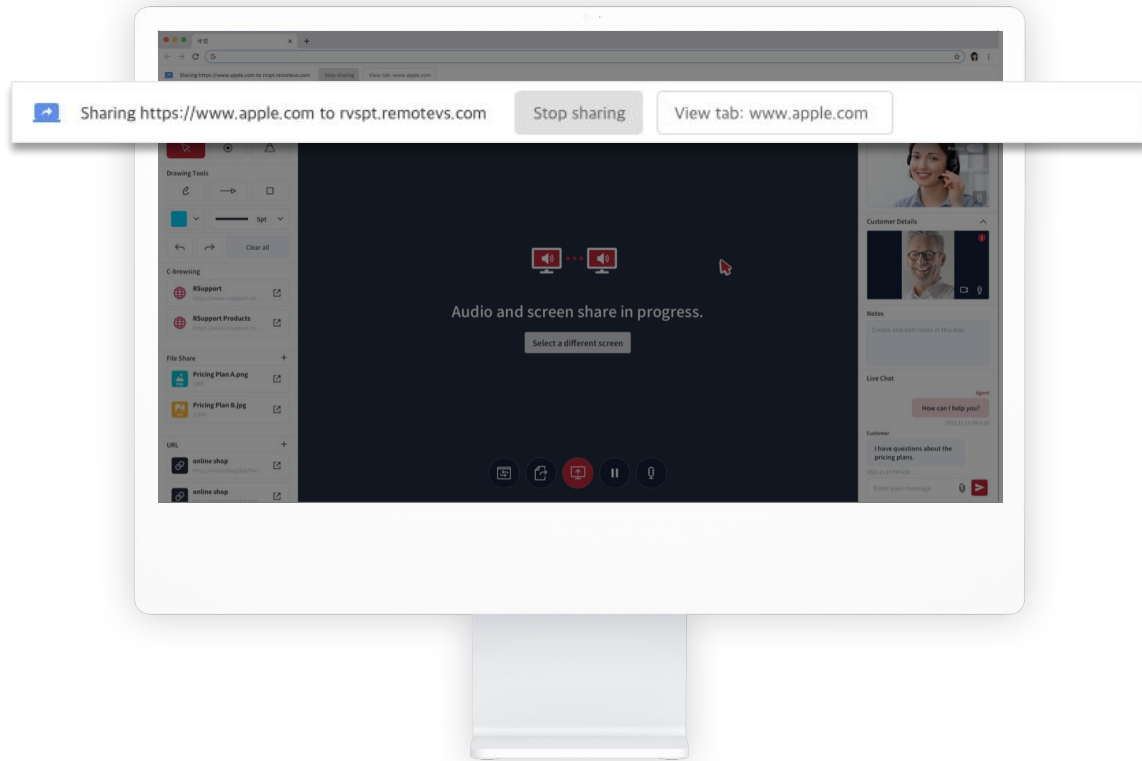

Supported Files: pdf, png, jpg, jpeg

✓ Customers can also send files or images to chat window.

[File sharing example]

# Share screen of agent

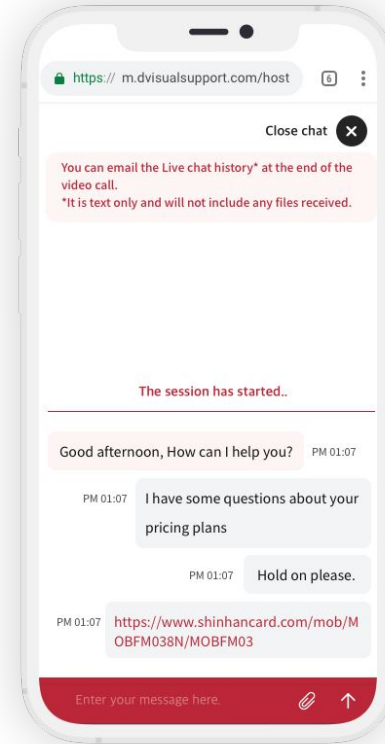

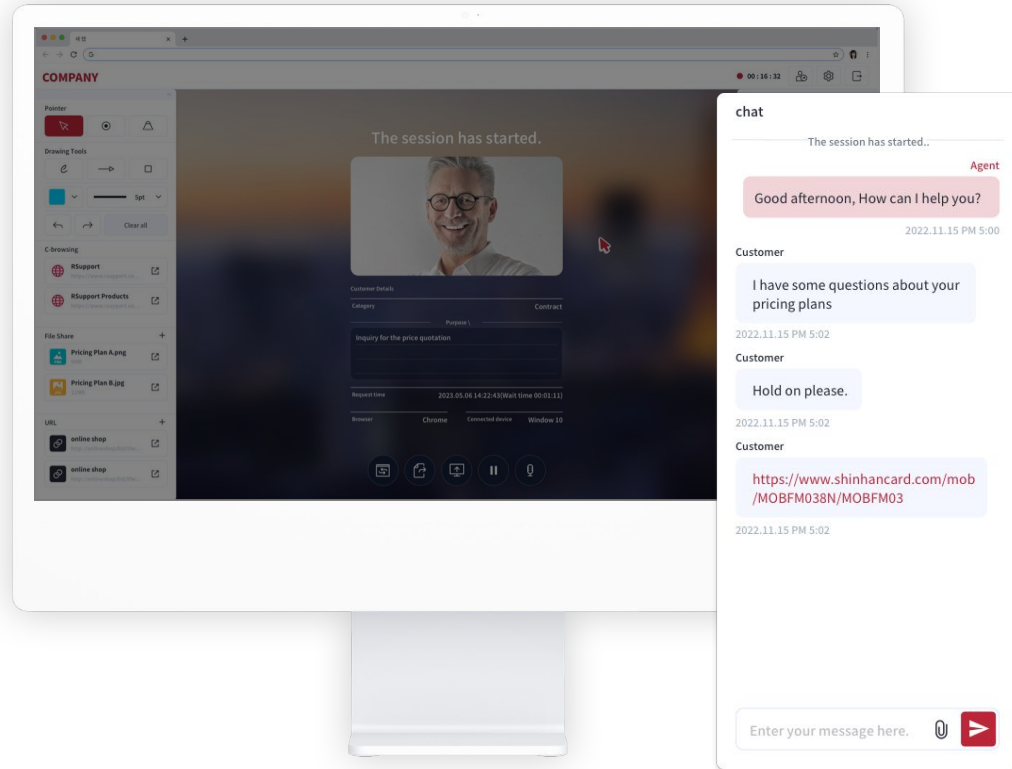

Agents directly share their screens in real time to guide and explain to customers.

- ✓ Share data which can be viewed on agent's device to customers in real time.
- ✓ Customers view the shared agent's screen together for a more accurate consultation.

# Live chat

Communicate with the client on live chat at any time during sessions.

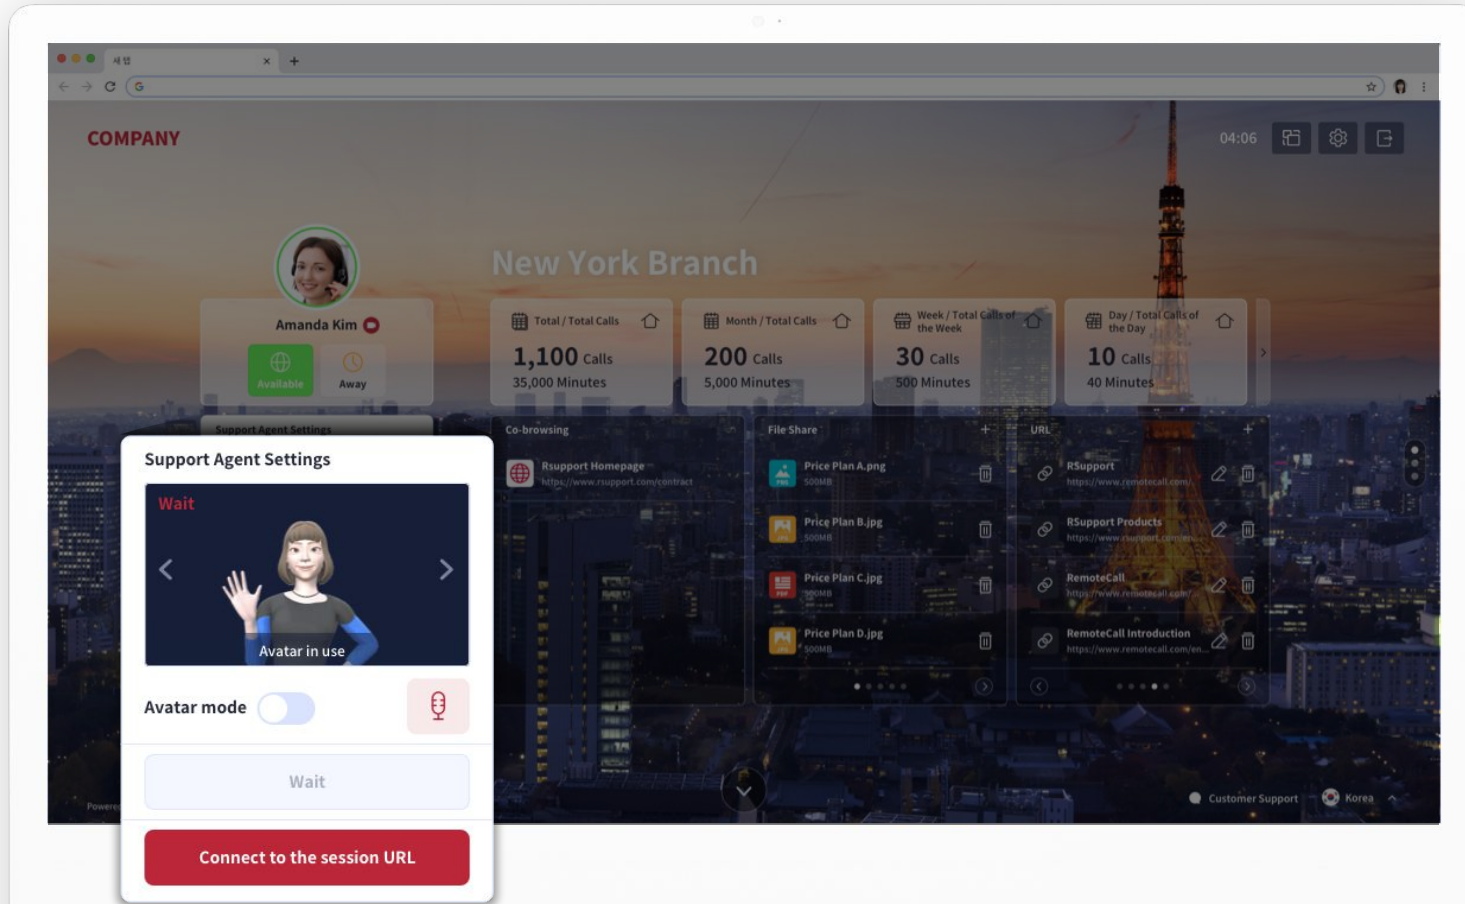

- ✓ Run Live Chat with the agent during a session.
- ✓ When the agent click a URL sent by the customer on the chat, it opens **in a new tab of a browser on the agent's side.**
- ✓ The contents of the chat can be **checked separately in the counseling support history** after the session is over.

# Set up agent avatars

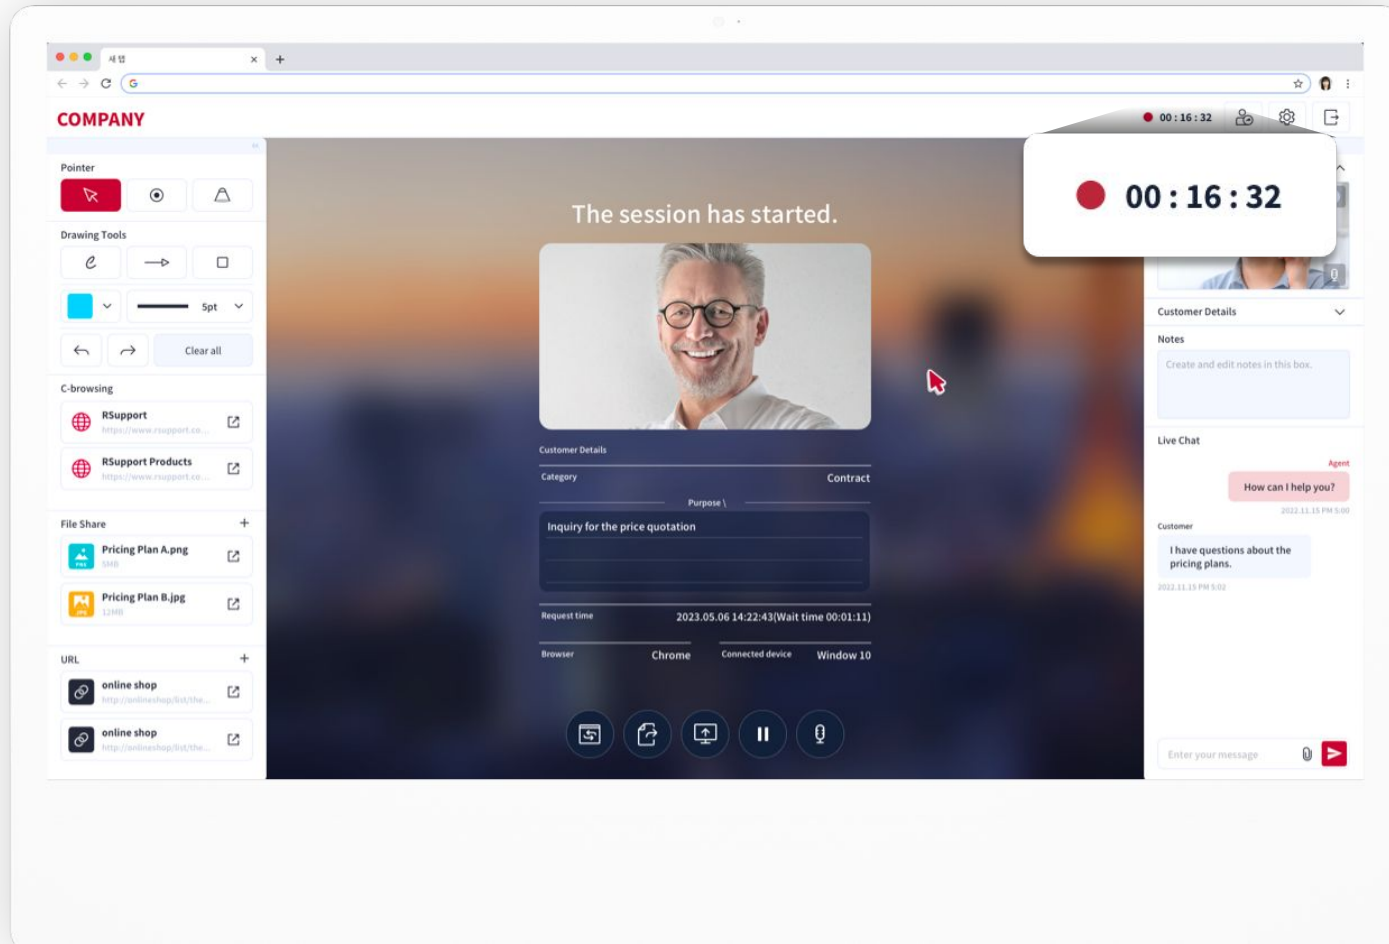

Casually consult with customers by setting agent's profile as an avatar.

- ✓ Set up a **3D avatar profile** on the Agent Waiting page and communicate with customers.
- ✓ The avatar will continue to display on the screen even if agent's camera is turned off.

# Screen Recording

Record and save screen during consultations in real time.

- ✓ **Start recording automatically** when a consultation is initiated.
- ✓ Automatic recording can be set on the Admin page, in addition to checking the recording history and playbacks.

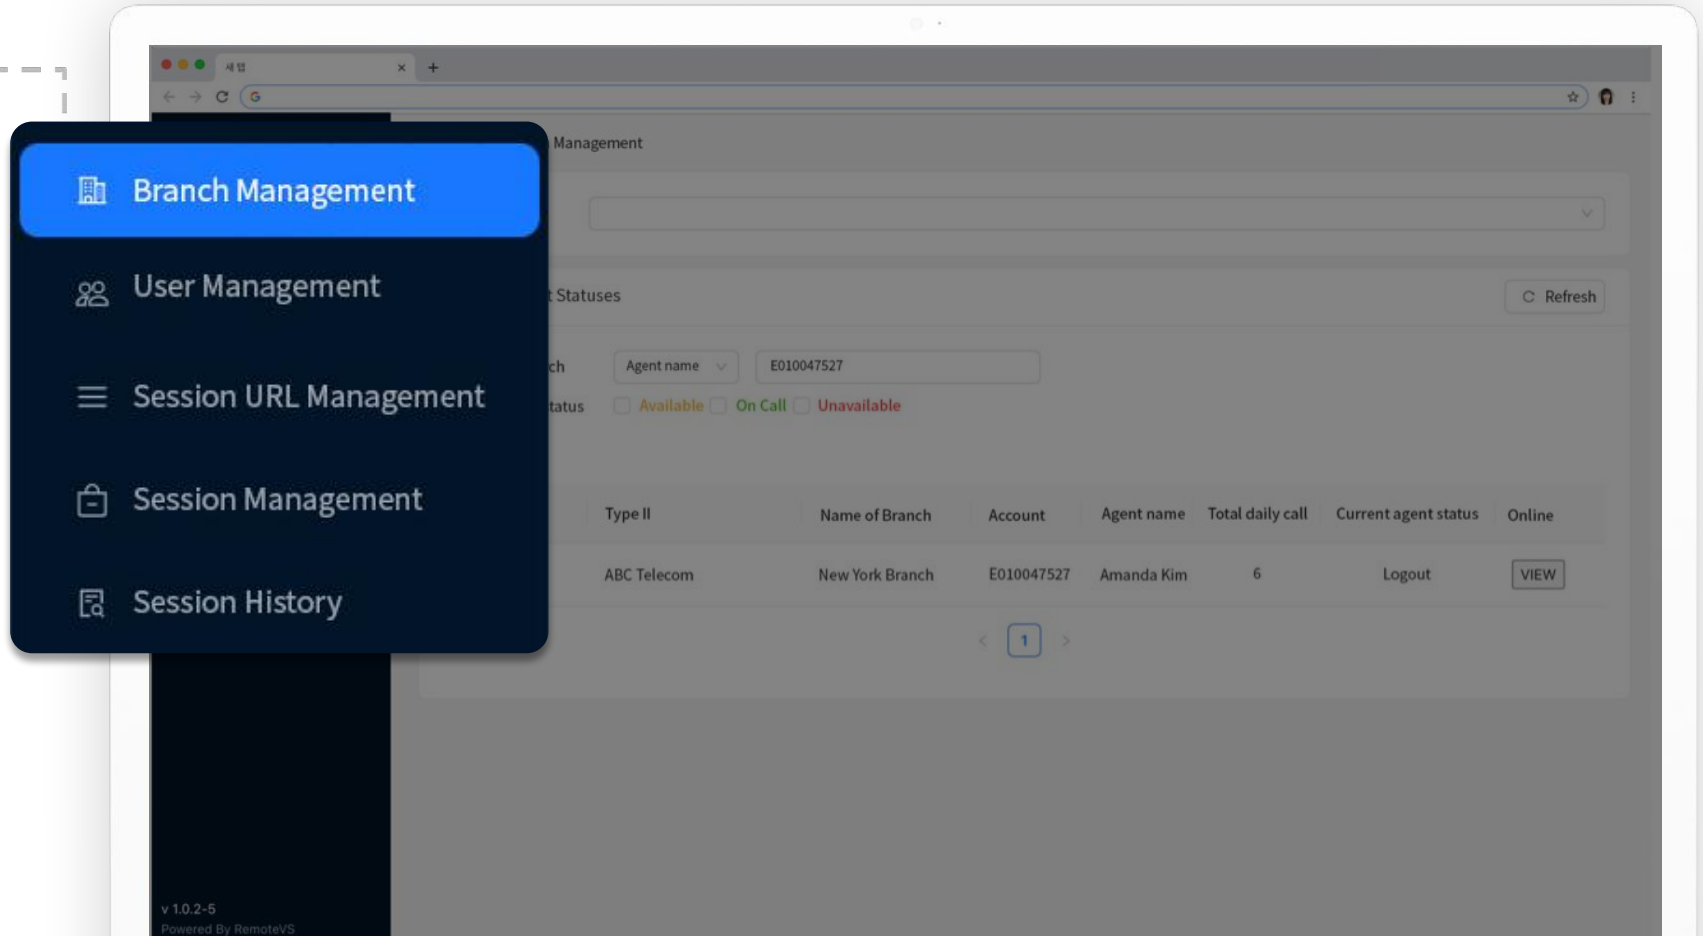

# Branch-by-branch Management

Manage agents of each branch and progress status of consultations, etc.

On a dedicated page, administrators check branch information and consultation history of agents.

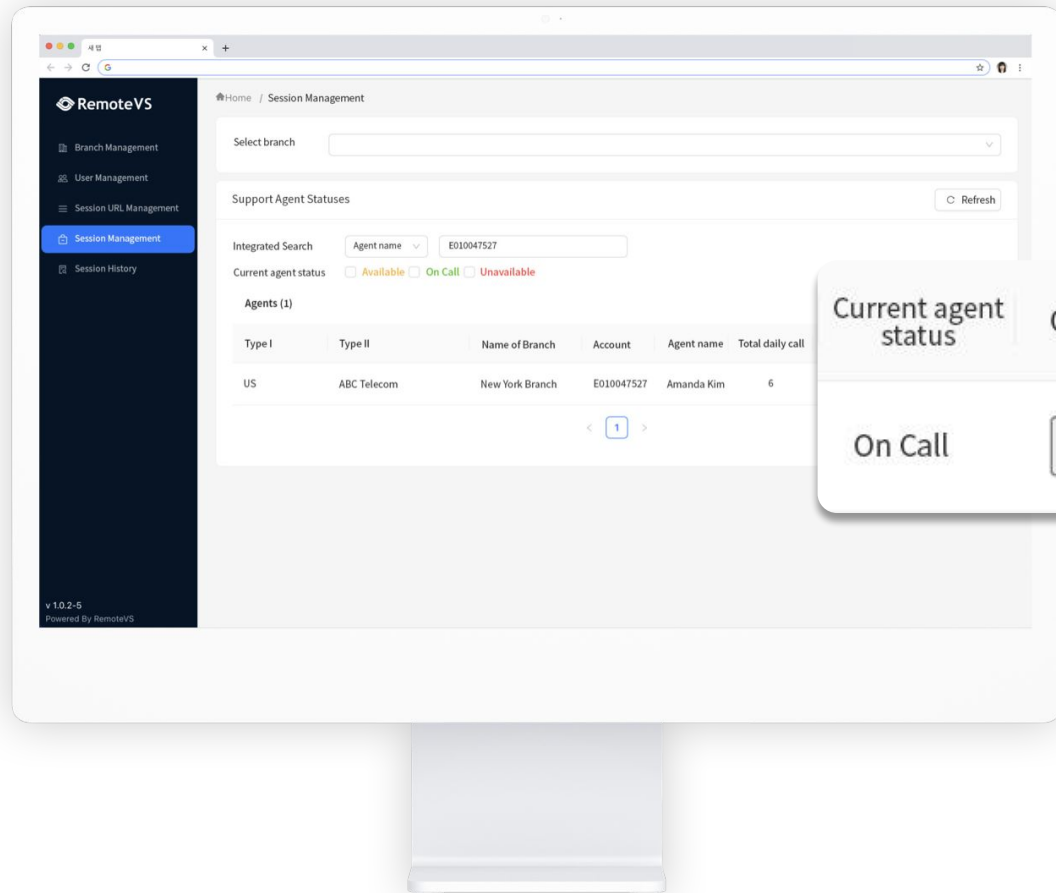

Example: Integrated Management Screen for Korea Correctional Service

# LiveView

Administrators monitor customer service status of all registered agents in real time.

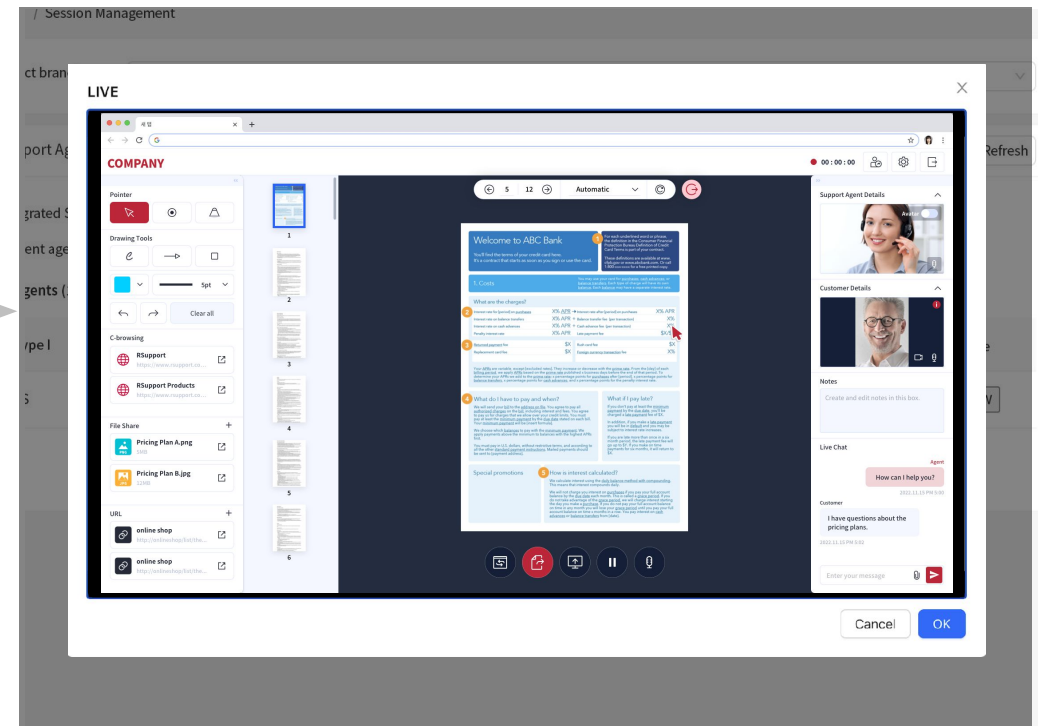

Current agent status

Online

On Call

VIEW

Monitor agent's status and screens during a session on LiveView in real time.

# Brand new experience with RemoteVS

## Save time and money

Reduce unnecessary visits by non-face-to-face consultations.

Save time and money of both agents and customers by efficient consultations.

## Providing excellent Customer Convenience

Customers **only need a web browser** to access the consultation system.

Customers can immediately check and receive guides without visiting office.

## Increase work efficiency

Agents proceed with non-face-to-face consultations immediately **without making a separate reservation** with the customer.

Support instant video consultations by easy and quick communication.
